## General Comment

NO! We do NOT want, nor need, increased radiation thresholds! As I see it, when someone or entity fails to perform their job properly we don't simply "lower the bar" because of their failures. This is plain and simply a "CYA." A few cases in point: WIPP, Bridgeton Landfill, St. Louis area landfill, and countless others have failed miserably and now you're spinning it all for damage control! 10,000 dead baby sea lions off the coast of a California island due to Fukushima as well and the handwriting is on the wall. I propose that ONE, if only ONE, good and honest man in your organization with integrity STAND UP and address the nightmare that you all have legislated the United States in to, the future of then U.S. and our children would stand a chance. SOMEONE PLEASE DO THE RIGHT MORAL AND ETHICAL THING HERE! The radiation is killing us all, and you people hold the smoking gun!
