Dear Mr. Lin,

I've reviewed your exempt distribution report dated January 2015.

Please revise and resubmit your report to indicate the following items that are required by 10 CFR 32.16:

- The products were transferred for use under 30.15, giving the specific paragraph designation (for example, 10 CFR 30.15(a)(8) for electron tubes),
- a description and/or identification of the type of each product, including the model number if applicable;
- the total quantity of each radionuclide contained in each type of product/model; and
- the number of units of each type of product transferred, by model number (if applicable).

Further information about the requirements that apply to annual reports of exempt distribution can be found in the attached Regulatory Issue Summary.

A hard copy of your revised report should be addressed and sent to:

Eric
