Subject: Excelitas Technologies Exempt Distribution Report 2014

Dear Mr. O'Brien,

I've reviewed your exempt distribution report for CY 2014.

Please revise and resubmit your report to indicate that the products are transferred for use under 10 CFR 30.15, giving the specific paragraph designation (for example, 10 CFR 30.15(a)(8) for electron tubes), or equivalent regulations of an Agreement State. You did not provide the model numbers for your products or give break downs according to model numbers. You also did not give the specific amounts of Kr-85 contained in your products and instead listed a maximum amount for all products. In your revised report, please include a description or identification of the type of each product and the model number(s), if applicable. Your revised report should include, for each radionuclide in each type of product and each model number, if applicable, the total quantity of radionuclide. Also, your revised report should include the number of units of each type of product transferred during the reporting period by model number, if applicable.

Further information about the requirements that apply to annual reports of exempt distribution can be found in the attached Regulatory Issue Summary.

A hard copy of your revised report should be addressed and sent to:

ATTN: Document Control Desk/Exempt Distribution
Director, Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

If you have any questions, please feel free to contact me.

Regards,
Eric
