Dear Secretary,

The NRC should reject the three petitions for rulemaking cited in the subject line out of hand. The agency should not even have accepted them for public comment in the first place, as they are frivolous and based on unsound science.

These three petitions seek to drastically weaken radiation protection standards. Ignorance of the danger to health caused by radiation has caused many examples of illnesses caused overexposure throughout the history of atomic weapons and power. Now that we understand the dangers of exposure to radiation, regulations should be made stronger not weaker.

John Wozniak
