Plymouth, MI 48170

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO.
21-32325-01

Dear Ms. Smith:

In a letter dated September 1, 2015 and by NRC Form 314, "Certificate of Disposition of Materials" dated September 1, 2015, you contacted the U.S. Nuclear Regulatory Commission (NRC) and indicated that licensee, Macomb Imaging Center LLC, wished to terminate its NRC radioactive material license. The NRC staff has reviewed the final status of the program. Based on its review, the staff has concluded that all licensable radioactive material has been removed from the facility at 38600 Van Dyke, Sterling Heights, Michigan and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions no further remediation or actions with respect to NRC regulated material is required. Your facility is suitable for unrestricted use and NRC license number 21-32325-01 is hereby terminated.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

If you have any questions, please contact me at (630) 829-9842.

Sincerely,

A handwritten signature in black ink that reads "Toye L. Simmons".
