Duke Energy Draft Response to RIS 2015-xx

Review and Submittion of Updates to Final Safety Analysis Reports, Emergency Preparedness Documents, and Fire Protection

Regards for information that may be withheld from public disclousre

Security at Duke Energy currently has a fleet procedure for the identifiication of public information being withheld per 10 CFR 2.390. Security did not have any comments of this draft. Duke has had involvement with the RITF working along with NEI on the response from Duke. Dukes position is that the NRC identify any information that should be identified as redacted.

Submittal of updates to the Final Safety Analysis Reports (FSARs) required by 10 CFR 50.71(e) be made electronically on a total FSAR replacement basis as described in 10 FR 50.4(b)(6).

This requirements is considered the best practice for submittal of the Duke Energy FSARs. This would include the Document Control desk along with the Region and Resident Inspectors.
