NRC/REGIONAL OFFICE</p> <p>Region III U. S. Nuclear Regulatory Commission 2443 Warrenville Road, Suite 210 Lisle, IL 60532-4352</p>	
<p>3. DOCKET NUMBER(S)</p> <p>030-31160</p>	<p>4. LICENSE NUMBER(S)</p> <p>21-26060-01</p>	<p>5. DATE(S) OF INSPECTION</p> <p>OCTOBER 22<sup>ND</sup>, 2015</p>

**LICENSEE:**

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

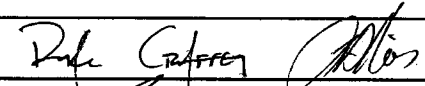

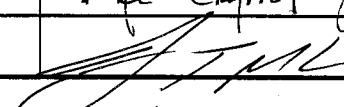

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s):

- 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.  
(Violations and Corrective Actions)

**Statement of Corrective Actions**

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Main Office Inspection                      Next Inspection Date: 10/22/2016

Field Office Inspection \_\_\_\_\_

Temporary Job Site Inspection TransCanada Meter Station on M-32, Elmira, MI

**PROGRAM SCOPE**

This was an unannounced routine inspection of a small non-destructive testing company authorized to store byproduct material at its shop in Gaylord, Michigan, and to use that material in the conduct of industrial radiography at temporary job sites throughout NRC jurisdiction. At the time of the inspection, the licensee had six radiographers (including the RSO) and seven assistants on staff, and had dispatched several to work at temporary job sites in Michigan and Indiana.

**PERFORMANCE OBSERVATIONS**

The inspectors observed the conduct of radiographic operations at a temporary job site in Elmira, Michigan and interviewed the radiographers on-site to discuss restricted area setup and control, equipment checks, survey instrument use, transportation of radioactive material and emergency response. Through these observations and discussions, the inspectors found the licensee's staff to be knowledgeable of radiation protection principles, licensee procedures, and regulatory requirements. The inspectors also found the radiographers' survey instruments and dosimetry to be properly calibrated and operable.

The inspectors toured the field office in Gaylord to evaluate the licensee's measure for hazard communication and exposure control. Independent surveys of the facility with licensed material in storage found no exposures to members of the public in excess of regulatory limits.

The inspectors reviewed a selection of safety-related records for items including quarterly equipment maintenance, leak tests, survey meter, rate alarm and pocket dosimetry calibrations, radiographer audits and dosimetry, which indicated maximum annual whole-body exposures of 1,661 millirem in 2014 and 1,144 millirem in 2015 through September 30.

No violations of NRC safety requirements were identified as a result of this inspection.
