General Comment

I challenge risky radioactive waste schemes, from their generation to storage, transport, and disposal. I challenge proposed new reactor construction and operation, as well as old reactor license extensions, based on the unaddressed risks of generating irradiated nuclear fuel in the first place. I oppose such risky transport and disposal schemes as the proposed high-level radioactive waste dump at Yucca Mountain, Nevada, and the "Fukushima Freeways" they would create through most states. You must release Mobile Chernobyl truck, train, and barge route maps through 46 states and the District of Columbia, bound for Yucca. I oppose the Yucca dump.
