Desc: In a letter From MR. Chris Miller of the NRC dated 11/06/2015 he stated:
39. Does the NRC have any Quality Assurance requirements/procedures for conducting safety related calculations? If so, what are they?

Response

No. As discussed in the response to question 1, the NRC staff does not perform "safety-related" calculations. Calculations may be performed by the staff as needed to support independent confirmatory analysis. In this case, the staff performed an independent analysis that received a peer review by a qualified NRC engineer.

Please provide me with a copy of this peer review.
