Comments to the Nuclear Regulatory Commission on Petition for Rulemaking: Linear No-Threshold Model and Standards for Protection Against Radiation Docket ID NRC-2015-0057 (PRM-20-28, PRM- 20-29 and PRM-20-30).

I am writing today to insist that human health, especially of those most vulnerable in our population, pregnant women, babies, and children, be prioritized above corporate profit in the nuclear industry.

If NRC wants to “simplify” its radiation exposure standards, they need to fully protect for these uniquely vulnerable human life stages (something they fail to do now) because ensuring protection for those most at risk would protect almost everyone else.

Considering available science and NRC’s mandate to protect humans from radioactivity, NRC should maintain the LNT as the basis for radiation exposure regulations.

Thank you for receiving my comments. I trust that your humanity will prevail in this matter.

Louise
Scientist and concerned mother
