**Subject:** [External\_Sender] Nuclear regulations....

Nuclear regulations are presently out of control... We need strict limits & not the soft sliding scale our gov has been going with. More comprehensive & specific testing for every form of radiation in our country, not less... The nuclear assault from Japan is escalating & we are slowly losing life on our west coast & the great Pacific Ocean. This is the largest threat to America from any outside source today. Instead of spending our outrageous military budget on war, let us instead use it to help end the nuclear threat on life from the countless diabolical nuclear plants who are presently spewing radiation upon our country & the world. I live on the west coast of OR & there has not been a single day where my thoughts & fears are not directed at the eminent threat of nuclear death & sickness common directly from Japan.. The situation is our call to tell the truth, protect our citizens & do what we can to bring a resolve to the constant spewing of radiation from this sight & the countless sights of nuclear plants in our own country.... We are at war with the very unethical nuclear industry... It's a war we must win, or we shall die... I was so offended & outraged as your institution raised our allowable radiation counts just months after the 3x melt down on Japan! Criminal... You put us into harms way & continue to do so by not collecting all varieties of radiation in our air, soil, water, food supply & giving Americans the tools & cautions to prevent cancer from filling our bodies & killing us. I know how this works, the silence is defining.. I lived through 3mi island & watched, over the years, so many people die from all sorts of cancers, I myself had a late miscarriage, the following year, for no 'apparent' reason... So did farm animals & many other women in the area... Silently we all suffered, as our very own government covered it all up... This nuclear war is out of control & we need strong leaders who are willing to call it out. Develop new energy sources so we can eliminate the danger of this nuclear assault & give life a chance to thrive, without sickness in our country & our world. I beg you & demand you address this runaway train, the lies, the manipulation of allowable radiation levels (ALL OF THEM) the danger to our food chain, the silence of the press, the total lack of ethics, care, legal actions, leadership failures, inspections of nuclear plants & areas of storage, our SAFETY, health & future of our lives, as we continue to live in this unacceptable level of so many

forms of radiation.... Do something POSSITIVE NOW... Befor it's to late & you have a cancer epidemic so out if control it wipes put the budget you so desperately need to exist. If life has no value to you as leaders, perhaps the \$ you weld has some impact on your decisions... Sick citizens can't pay taxes, support the economy or give you a job... Thsnk you for reading this. Louise nelson, terrified on the or. Coast, u. S. A.
