General Comment

Sirs-

Pray consider;

The exposure standards changes in and of them selves resulting to this-'adaptive' model;which doesn't match reality even with a 'Mal' prefix. Can only be used too hide how quickly you are already killing us all. How long after this moving target-'aspirative ' standard is used too cover up how bad,how quickly and when radiation levels got over the Haz Mat threshold?

Can it matter with the Pantex(of Texas) plutonium shipped to Japan -spewing out of the malware infested wreck of an Israeli

'secured' laser isotope separator complex that apparently 'went critical' nearly 15 minutes BEFORE the wave hit?

Yes it does.

While all evidence suggests that this and the Dimona meltdowns are fatal levels for us all and everything with a spinal column, these-'estimates' may be off notwithstanding the huge quantities of-'depleted' 'uranium' some who should have being aborted 'types' have being blasting about too cover-up how bad the 'background' levels had already become-over 20 years ago!

Yet-these estimates may be slightly off,and a way we- can't see around or through our collective demise found.

I know-"The Horse may sing". But we have NO other option.

Which hypothetical option I can say for sure- Will require accurate records and datum points. UN altered

records on the same reading scales.

Schroedinger's Cat - Meets Blaise Pascal's bet.

My markers will NOT be placed on Jeusessss separating out the Tritium from either the water or the wine.

I expect he would be busy enough with removing the plutonium from the loaves & fishes.

So we had better count only on our own collective help.

The time for being effective may not quite be past.

No possible future is even possible if we keep lying to ourselves in this and many other matters.

Even if the no threshold model is wrong or even only partially correct-

Questions of changing it now and for the reasons behind the 'Public Relations Science' do nothing of use for us and any possible future.

It rare that you can owe both the unborn and the dead at the same time.

Rejecting this revisionist model tarted up as facts after the fact presents you with one of those moments.

Keep therefore the present No Threshold Model and figures obtained thereby.

Todd Millions
