General Comment

You know perfectly well that the LNT has the greatest scientific consensus at the moment. The hormesis people are a radical fringe. On the other end of the spectrum are Gofman, Burlakova, and Busby, who all insist on a bi-phasic dose-response model. Or, both camps could be right, as explained in Paul Zimmerman, A Primer in the Art of Deception. Check it out, be scientifically honest and at least go for the precautionary principle and adhere to the minimal middle-road model, the LNT.
