General Comment

As a mother and a grandmother I am outraged by this most recent effort to grant the nuclear industry another free pass on polluting our planet! Children and women are the most at risk when being exposed to radiation. Why would you put the most vulnerable population at risk, simply to increase the nuclear industries profits????? No amount of exposure is healthy, so you would have to be brain dead to think doing away with the limits allowed would be in the American populations best interests! Your job is to ensure the safety of your constituents, not the profits of the nuclear industry. Do your job and reject the nuclear industries lobbying for immunity for their reckless endangerment of the planet.
