PUBLIC SUBMISSION

Docket: NRC-2015-0057

Linear No-Threshold Model and Standards for Protection Against Radiation

Comment On: NRC-2015-0057-0086

Linear No-Threshold Model and Standards for Protection Against Radiation; Extension of Comment Period

Document: NRC-2015-0057-DRAFT-0508

Comment on FR Doc # 2015-20722

Submitter Information

Name: Jackie Anonymous

General Comment

I ask all of the countries & continent officials who are about to discuss "radiation, its effects on this planet & the people", to take an hour out of your day to sit in silence somewhere special. I would like them to truly think about their own families, I want them to UNDERSTAND our society needs to be warned "seriously" about WHERE this planet we call "HOME" is currently heading, spiralling out of control. It is going to die from the suffering man has delivered through the blatant disregard for the environment. If NOTHING is accomplished except that you ALL have a discussion about IT. I will know that I have made some sort of difference. You are the elected people of your country. We elect you through a democratic society (or I like to think so.) YOU have the right to choices that WE the people who elect YOU, DO NOT HAVE! I want YOU to seriously view the world as it currently stands. This is after all about each & every one of US that share this once plentiful planet. (If mankind is to survive at ALL!) The discussion MUST be NOW...ON the 11th March 2011 an accident of such global and significant proportions occurred. An earth quake measuring an enormous 9.3 mag hit Japan, it in turn turned into a Tsunami. A wave of unprecedented heights killed & displaced hundreds of thousands of people; It also breached & broke an already disabled nuclear power plant in Fukushima, located in the Daiichi Precinct. This incident saw FOUR NUCLEAR REACTORS corrupted & commencing MELT DOWN. The critically damaged site is TERMINAL. "WE," have entered a downward spiral of GLOBAL environmental terror, the scientists speculate this unprecedented situation & the world is in serious trouble. FOCUS must be on the poisoning of 46% of the planet's surface represented by the Pacific Ocean...The Pacific Ocean has inarguably worn the majority of the radiation contamination with steep readings of a concoction of deadly noble gases coming in from the West Coast of America, British Columbia & Alaska, Unprecedented sea mammal deaths & starvation have been recorded since 2011. The global media reports nothing of the disaster. Independent Marine biologists & the concerned public have been left to report the disaster. The Global community is focusing on the "Terrorism" threats. (Fictitious and Government backed money making revolting practice.) Whilst NOTHING is growing or living along the coastlines of

those West American, Alaskan countries? The REAL TERRORISTS are those Governments' who support these practices. The Pacific is Dying & to an extent so WILL the peoples of the forty countries touching the Pacific Ocean! The industries that rely on fishing, the consumers of that industry globally have all been fatally compromised. Australia IS "required" from (a human rights point of view) to ensure survival of the Pacific Nation Countries by becoming the "food bowl". Surely we as PEOPLE of this Planet MUST INSIST that ALL Governments HALT THE UNNECESSARY extraction of fossil fuels. Concentrate on the enormity of the continuing devastation that is FUKUSHIMA. Future investment into safe, clean, renewable energies. The halting this risk to viable fresh water enabling Australia to accommodate the responsibility of feeding nations. The Australian Government must retain entitlement of ownership of the country. Cease from selling to foreign investors. Stop fossil fuel raping of these fertile soils & subsequently contaminating the aquifers. We as a race have the knowledge to save the planet. Why aren't we doing so? We also know of a miracle plant that can replace plastic and paper, oils and textiles, fuels and medicines. Grows anywhere and replenishes soil balance & fertility. The plant is cannabis, it SHOULD be grown personally & industrially for maximum benefit. Many American states have relaxed the laws against Cannabis, stimulating growing support for the removal of prohibition. The American President also doubled the acceptable levels of radiation in the water supply for his own people. I believe that the only reason cannabis has been bought back into vogue is because we will see a STEEP rise in cancers & radiation induced diseases. The Government knows full well the magical qualities of the plant they were always going to prevent the plant into the hands of the people by outlawing it. They never expected the magnitude of the disaster known as FUKUSHIMA. There is reported evidence of cancer beating properties found within cannabis plants with the Americans admitting that they have known this since the early 1970's...FUKUSHIMA radiating the oceans and planet since 2011 and not stopping ever...I believe that it is MY RIGHT AS A HUMAN ON THIS PLANET to insist that YOU PEOPLE IN POWER DO ALL YOU CAN TO CONTAIN THE RADIATION AND PROVIDE A SAFER ENVIRONMENT FOR US ALL.
