## General Comment

What you are proposing is the near elimination of limits on man-made ionizing radiation exposure. The science is out there to prove that chronic dosing of low levels of radiation; including from Fukushima's ongoing fallout; is more hazardous than one-time high exposures. Our society is bombarded with radiation from sources all over the globe. This must end. We must work to end the polluting of our world...not excuse it and accept it. The cancer rate among our citizens continues to climb. Internal exposure causes cancer. Your proposal would be a huge step backward.
