Subject: [External_Sender] White Paper on Ablation
Date: Friday, July 17, 2015 10:00:56 AM
Attachments: [07_15 AMT White Paper.pdf](#)

Stephen,

See the attached white paper on Ablation Mining Technology that was sent to us yesterday by Black Range Minerals. This paper is being provided to us so that we may consider what, if any, regulatory requirements would apply to use of this technology in Colorado.

We intend to hold a public comment process in the next couple of months to solicit feedback from stakeholders on these issues. During this time we would also like feedback from NRC regarding this topic.

I'll let you know when we have more information regarding our review process. In the meantime if you have any questions or concerns, please feel free to contact me.

Thank you,
Jennifer T. Opila, MPA
Radiation Program Manager

Jennifer,

Attached is a white paper that describes Ablation Mining Technology (AMT) and legal analysis of regulatory authority as to AMT applied to uranium deposits. After your review, we would greatly appreciate a meeting with CDPHE to discuss the issue. I will send to you a hard copy of the paper for your files.

Respectfully submitted,

Rod Grebb
