

Integrated Response to Fukushima

Tony Pietrangelo

Senior Vice President and Chief Nuclear Officer

November 17, 2015

Progress Continues

- FLEX implementation on schedule
- Guidance development for Mitigating Strategies Assessments on schedule
- Extensive work by NRC staff on remaining Tier 2 and Tier 3 recommendations

Tier 2/3 Recommendation Plans

- NRC staff work to develop dispositions is an excellent example of integration
 - Several activities were subsumed in Tier 1
 - Technical work on related activities informed ongoing efforts
 - Maintained technical rigor
 - Maintained engagement with stakeholders

Looking Forward

- Considerable work remains
 - Industry completion of FLEX implementation
 - Proposed and final rules on Mitigating Beyond Design Bases Events
 - Finalize guidance for flooding and seismic Mitigating Strategies Assessments (MSAs)
 - Licensee conduct and NRC staff review of MSAs

Challenges Going Forward

- Implementation and Inspection
 - Hundreds of new people will be using the rules and guidance developed for dealing with beyond design bases events
 - This is new territory
- Oversight and Review
 - Must maintain a forum to resolve issues and questions that inevitably will be identified

Conclusions

- A tremendous amount of work has been completed that defines our response
- Substantial work remains for industry and NRC
- Rigorous execution and oversight must continue to ensure successful implementation
