**Subject:** [External\_Sender] Linear Non Threshold rules (Docket ID NRC-2015-0057)

*It took a long time for the NRC to accept the Linear, Non-threshold rules with regard to radiation exposure. Previous acceptance of a safe dose were not in accord with the responsible studies of the issue. In fact there is NO SAFE DOSE of ionizing radiation! Ask a targeted cancer cell. Ask the residents of Hiroshima. Ask the former workers at Rocky Flats. As the residents of the Chernobyl region and the animals in that fallout region. Ask John Wayne and the thousands exposed to fallout from above ground US nuclear tests that the CDC figured to have suffered from Thyroid cancer and other problems.*

*It took billions of years of planetary cooling to get past the half lives of Plutonium any only then did significant life on earth begin. The nuclear industry, like the tobacco industry and the oil and gas industry want to continue to despoil the planet and its inhabitants for profit with as little regulation as possible.*
