This may not be the proper format to submit my comments to you, but this is what I placed on my FB timeline this morning:

ALERT !!! The deadline is tomorrow ! Sorry for the short notice frown emoticon

NOV 19 DEADLINE to comment to NRC re: potentially easing radiation exposure rules:  
~~~ has alerted us to a November 19 deadline to send comments to the NRC

re: three petitions presented to the NRC to drop ANY regulation of radiation below 10 REMS a year (that is 100 times higher than its current insufficient regulation levels). The petitioners advocate for Hormesis (quackery) claims that radiation exposure is directly beneficial. Petitioner Carol Marcus is quoted at the end of this email saying "Why deprive the public of the benefits of low dose radiation?"
