Glen Allen, VA 23060

SUBJECT: DOMINION REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE (TAC NO. L25047)

Dear Mr. Sartain:

By letter dated August 24, 2015, you submitted the "North Anna Power Station Independent Spent Fuel Storage Installation (ISFSI) License Amendment Request Regarding Proposed ISFSI Technical Specification Changes to Allow Storage of Increased Maximum Enrichment and Burn-up Fuel in a Modified TN-32B Storage Cask". This request included an affidavit from AREVA Inc., dated July 20, 2015, seeking to withhold information from public disclosure contained in the following document pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Part 2, Section 2.390:

- Portions of Attachment 4-the design/licensing basis document for the TN-32B Dry Storage Cask
- Attachment 4 (appendix A)-Licensing design drawings

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (1) The information sought to be withheld from public disclosure involves certain design details and analyses, experimental results, and modeling approaches related to the design of the modified TN-32B dry storage cask (high burnup demonstration cask), which are owned and have been held in confidence by AREVA Inc.
- (2) The information is of a type customarily held in confidence by AREVA Inc. and not customarily disclosed to the public. AREVA Inc. has a rational basis for determining the types of information customarily held in confidence by it.
- (3) Public disclosure of the information is likely to cause substantial harm to the competitive position of AREVA Inc. because the information consists of descriptions of the design and analysis of a dry spent fuel storage system, the application of which provide a competitive economic advantage. The availability of such information to competitors would enable them to modify their product to better compete with AREVA Inc., take marketing or other actions to improve their product's position or impair the position of AREVA Inc.'s product, and avoid developing similar data and analyses in support of their processes, methods or apparatus.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the U.S. Nuclear Regulatory Commission (NRC). You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-415-0262.

Sincerely,

/RA/

John-Chau Nguyen, Sr. Project Manager
Spent Fuel Licensing Branch
Division of Spent Fuel Management
Office of Nuclear Material Safety
and Safeguards

Docket No.: 72-16
TAC No.: L25047

Therefore, the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.
