Subject: [External_Sender] LNT to hormesis is craziness

Please PLEASE do NOT change from LNT to the hormesis theory, it's simply NUTS thinking ANY amount of radiation is "good for me", on the contrary WE ALL KNOW IT ISN'T! To think that you would believe this, being the very entity that is tasked with regulating the nuclear industry AND setting guidelines and standards for it, is even more crazy! You MUST keep the Linear-no-threshold model in place! I simply cannot believe I must fight my own government to not only protect me from run away industries, but also to protect the environment, you do realize WE ALL SHARE THIS ONE GLOBE CALLED "EARTH" RIGHT?! The environment does NOT need us, but we NEED the environment.

Ask yourself this: have we learned NOTHING from Chernobyl and Fukushima?! I also do not know how you can look into the eyes of your children and your grand children and not realize you're about to say they are lab rats, in an experiment, where you risk their health to prove the hormesis theory and/or buckled under pressure from an industry that is literally risking the ENTIRE PLANET!

The is no safe dose of ionizing radiation, there are MANY reputable scientists who's research supports this! Dr. Karl Z. Morgan (father of Health Physics) says: "There is NO safe level of exposure and there is no dose of radiation so low that the risk of a malignancy is zero".

Dr. J.W. Gofman wrote: "...the human epidemiological evidence establishes-by reasonable standard of proof-that there is no safe dose or dose-rate....the safe-dose hypothesis is not merely implausible- it is DISPROVEN."

Rosalie Bertell, P.H.D. said: "...there is no safe level of exposure to ionizing radiation, and the search for quantifying such a safe level is in vain".

I could literally go on for pages, with names of scientists, doctors and experts in the field, AND their findings but I think you have enough, there is ABSOLUTELY NO REASON to change the LNT, we have ENOUGH things killing us, in this world, coming from out of control industry, we do not need more doses of ANYTHING to speed up our death and if there is one thing on this planet that can do that to us all, that's radiation.
