HI Barbara,

It was a pleasure meeting you Thursday night at the DOE WVDP Quarterly Public Meeting. Thank you for the letters you attached.

Please see requested information attached regarding information that is publicly available in ADAMS regarding the CSAP and links regarding documents related to NRC's comments on climate can be found at:

View ADAMS P8 Properties ML15324A359
Open ADAMS P8 Document (Email from Z. Zadins, Chenega Global Services, Contractor, West Valley Demonstration Project and Email Response from C. Barr, U.S. Nuclear Regulatory Commission Regarding Climate Change Guidance)

View ADAMS P8 Properties ML13022A289
Open ADAMS P8 Document (C. Glenn Ltr Re: NRC Comments on: "Recommendations for Phase 1 Erosion Studies West Valley Demonstration Project (WVDP) and Western New York Nuclear Service Center (WNYNSC)," Prepared by WVDP Erosion Working Group)

If you have any questions, please contact me.

Thank you
A

Subject: [External_Sender] West Valley

Amy,

It was good to talk with you. I would like to receive any links you could provide re: NRC input and the CSAP.

We have not been receiving any of the updates about the things we are most interested in.

We have not been informed about the contamination under the concrete pad or about other CSAP activities.

Erosion is a major factor at this site and climate change-- especially heavy rainfall could act

synergistically to release rad waste in a landslide event.

Instead DOE decided to deal only with average rainfall for assessments. Clearly this does not represent a proper assessment.

I recommend reading the Climate change memo from the Citizens Task Force that was sent to all our officials.

Earlier comments were sent on climate change if you are interested in the problematic "climate guidance" prepared by a consultant.

I am attaching our recent request for Agenda items and our recent comments on the Exhumation Study.
