AREVA Inc. Licensing & Regulatory Affairs Changes

AREVA Inc. (AREVA) is pleased to announce a restructuring of the U.S. Licensing & Regulatory Affairs organization. Mr. Pedro Salas, Director of Licensing & Regulatory Affairs for the last four years, has resigned from the company. Mr. Gary Peters replaces Mr. Salas in this role and will be the primary contact for all NRC interactions involving regulatory activities for AREVA.

Licensing work for all business units of the company will be served by this organization, including nuclear engineering, electrical and I&C engineering, fuels engineering, nuclear services, and project management. All correspondence will be issued from and should be addressed to the same Lynchburg address used for Mr. Salas, but to the attention of Mr. Peters.

Responsibilities associated with the management of Part 21 determinations, identification of proprietary information, the preparation of affidavits, the submittal of topical reports—including responses to Requests for Additional Information—and the statement of Company positions on policy issues, rulemaking, and regulatory interpretations will be developed by and issued from the Licensing & Regulatory Affairs office.

Sincerely,

A handwritten signature in black ink that reads 'M V Parece' with a long horizontal flourish extending to the right.

Martin V. Parece, Vice President
Products & Technology
