## General Comment

I would only request that I do not have to live in fear. Radiation is one of those things that is truly terrifying. I want to be safe and I want my friends and family to be safe. How can we be if there is no limit to radiation? It has been proven time and time again that radiation is dangerous, causing birth defects and cancer in humans and animals. We need to protect America, not damage it further. I urge the NRC to put a threshold on radiation and protect the citizens of this country.
