LISLE, IL 60532-4352

NOV 24 2015

Mack L Richard, M.S., C.H.P.
Radiation Safety Officer
IUPUI/Indiana University Medical Center
Radiation Safety Office
541 Clinical Drive
Indianapolis, Indiana 46202-5111

Dear Mr. Richard:

Enclosed is Amendment No. 104 to your NRC Material License No. 13-02752-03. Please note that the changes made to your license are printed in **bold font**.

In accordance with our telephone conference on November 23, 2015, please note that we have not approved your amendment request related to survey instrument calibration at Indiana University Health facilities. In order to complete our review of your request, we will need you to submit additional information on the IUH facilities as discussed in our teleconference. We will continue our review of your request, upon submittal of the additional information.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The enclosure document contains sensitive-related information.
When separated from this cover letter this is uncontrolled.

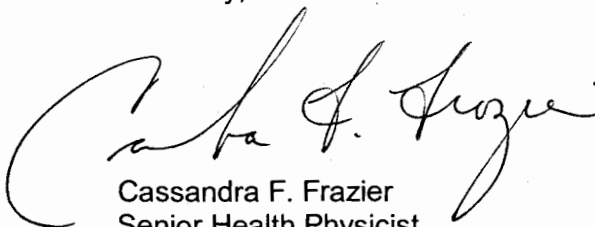

M. Richard
