RE: License #06-31314-02 (Amendment)

Mail Control # 588926

Farrah,

Per our conversation today, I am writing to confirm that we do intend to place a dose calibrator (Model: Capintec CRC 25W or equivalent) at our site at 478 Burnside Avenue, East Hartford, CT. Additionally there is a GM meter on site already which we will have calibrated prior to use by us.

The hot lab is located in the imaging space and has a lead mini "L" block shield and lead bricks. We will be using unit-dose only.

Please let me know if you need anything further from me. I appreciate your help on this license amendment.

Sincerely,

Michael White, BS-CNMT
Chief Quality Officer
