General Comment

Dear NRC Commissioners,

Before submitting my comments on the ongoing water issues at Yucca Mountain, I wish to point out a few issues that I encountered in regulations.gov.

1. When I go beyond the allotted space, directions are difficult to follow and caused loss of my comments
2. The tracking number does not seem to work. There have been exceptions.
3. Regulations.gov gives me a receipt, but NRC doesn't acknowledge. How can I determine if NRC got my comment?

The limitations on what is considered in a particular hearing is artificial and misleading, or leads to an erroneous conclusion.

Kevin Kamps gave a stirring connection between native American beliefs and water. I was remiss in that I did not give the relationship between many Judeo Christian beliefs and water. Suffice it to say immersion in water is part of those beliefs.

My comments at that hearing concerned the endangerment of getting the Nation's SPF over overstressed infrastructure to Yucca mountain and how water all along that route or routes can and will be endangered by accident or malice like that seen 2days ago in Paris.

I ask that the staff put themselves in the same place as the public along these "mobile Charnobyl " routes and think of the water. How will the water be impacted by accidents? How will the water be impacted by an accident at Yucca?

Respectfully submitted,
Marvin Lewis
