REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

DEC 01 2015

William S. Gooch
Radiation Safety Officer
Medical Outsourcing Solutions
1735 Dekalk Avenue
Sycamore, IL 60178

Dear Mr. Gooch:

Enclosed is Amendment No. 01 to your NRC Material License No. 12-35254-01 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Based on the letter dated September 10, 2015, and a discussion with you via telephone on October 28, 2015, you requested an exemption from 10 CFR 35.80(b) for the proposed location located at Barton County Memorial Hospital (Hospital), 29 NW 1st Lane, Lamar, Missouri. The proposed location of use is a fixed location listed in the enclosed license and access to the use area and licensed material is controlled by Medical Outsourcing Solutions. In Item 10.7 of the attachment, you stated that Hospital's employee will not be involved with the handling or the receipt of licensed material. Based on the above, you deemed to be in compliance with 10 CFR 35.80(b) at Barton County Memorial Hospital. Therefore, we did not continue the review of your exemption request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Frank P. D. Tran
