GLE-2015-0155
October 16, 2015

Attn: J. Marcano
Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Docket 70-7016

Subject: (U) GLE Response to NRC Generic Letter 2015-01 "Treatment of Natural Phenomena Hazards (NPH) in Fuel Cycle Facilities", 6/22/15

References: (1) License SNM- 2019, Docket 70-7016
(2) License SNM- 1097, Docket 70-1113
(3) NRC Generic Letter 2015-01 "Treatment of Natural Phenomena Hazards (NPH) in Fuel Cycle Facilities", 6/22/15
(4) GNF-A Response to NRC Request for Additional Information, SPM 15-027, 09/22/2015

Global Laser Enrichment, LLC (GLE) provides the following response to the NRC Generic Letter 2015-01 (Reference 3) as a clarification to GNF-A Response (Reference 4).

Per Reference (1) (Para. 11) UF6 will not be introduced into the Commercial Facility until the Commission completes a construction inspection.

GLE falls under two licenses. The Commercial Facility License SNM 2019 (Reference 1) is being held in abeyance, until such time as GE plans on building said facility. The Generic Letter application and the effects upon the analysis will be reviewed and updated at that time. The current GLE operation falls under the SNM 1097 License (Reference 2). As such the GNF-A response (Reference 4) covers the GLE operation and timeline.

If there are any questions regarding this letter and its contents, please do not hesitate to contact me at 910-819-7447 or at pat.jenny@ge.com.

Sincerely,

Pat Jenny
GLE Security Manager/ Licensing Manager
