GNRO-2015/00093

December 14, 2015

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555-0001

SUBJECT: Request to Withdraw the License Amendment Request (LAR) to Revise Battery Cell Resistances to Address Potential Non-Conservative Technical Specification Grand Gulf Nuclear Station, Unit 1
Docket No. 50-416
License No. NPF-29

REFERENCE: Revision to Battery Cell Resistances to Address Potential Non-Conservative Technical Specification License Amendment Request in letter GNRO-2013/00080, dated June 26, 2014 (ADAMS Accession No. ML14177A270).

Dear Sir or Madam:

On June 26, 2014, Entergy Operations, Inc. (Grand Gulf Nuclear Station) submitted the referenced LAR requesting approval of a change to the Technical Specification resistance values for safety-related batteries.

On December 3, 2015, a teleconference was held between staff from the Grand Gulf Nuclear Station and the Office of Nuclear Reactor Regulation's Department of Operating Reactor Licensing to discuss the methodology for measuring inter-cell resistance values.

After further consideration, Grand Gulf hereby requests withdrawal of the referenced LAR from NRC review.

There are no new commitments in this letter. If you have any questions or require additional information, please contact Mr. James Nadeau at 601-437-2103.

I declare under penalty of perjury that the foregoing is true and correct. Executed on December 14th, 2015.

Sincerely,

KJM/ras
