SUBJECT: SUMMARY OF NOVEMBER 18, 2015, CLOSED MEETING WITH  
GENERAL ELECTRIC-HITACHI

On November 18, 2015, staff from the U.S. Nuclear Regulatory Commission (NRC) met with representatives of General Electric-Hitachi (GE-H) and Exelon Nuclear Corporation in a closed meeting. The purpose of the meeting was to discuss technical aspects of the NRC staff review of GE-H topical report (TR) NEDE-33005P, "TRACG Application for Emergency Core Cooling Systems/Loss-of-Coolant-Accident Analyses for BWR/2-6." The meeting was closed to the public because the information to be discussed was proprietary to GE-H. Specifically, GE-H's draft responses to the NRC staff reviewers' requests for additional information (RAIs) regarding the TR were discussed. Also discussed was the review schedule.

A list of meeting attendees is enclosed. The meeting notice is available at Agencywide Documents Access and Management System (ADAMS) Accession No. ML15300A453. A non-proprietary version of the TR may be viewed by the public at ADAMS Accession No. ML110280325 (TR cover letter at ADAMS Accession No. ML110280323). A non-proprietary version of the RAIs that were discussed may be viewed at ADAMS Accession No. ML15204A582.
