

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

December 17, 2015

Mr. Richard S. Goorevich, Senior Policy Advisor  
Office of Nonproliferation and Arms Control  
National Nuclear Security Administration  
U.S. Department of Energy  
1000 Independence Avenue, SW  
Washington, DC 20585-1615

Dear Mr. Goorevich:

Enclosed is an application, dated November 25, 2015, received by the U.S. Nuclear Regulatory Commission, from AREVA, Inc., for amendment No. 01 to its existing license, XSNM3722. The license presently authorizes the export of low-enriched uranium (LEU) to France for fuel fabrication and then to the Netherlands for ultimate use as fuel elements for High Flux Research reactor in Petten, or for use as targets to be irradiated in European research reactors and qualified for production of Molybdenum-99 at Covidien.

The purpose of the amendment is to: 1) update the list of "Other Parties to the Export;" 2) update the names and/or addresses of several "Intermediate" and "Ultimate Foreign Consignees;" 3) change the licensee point of contact; and 4) extend the date of expiration from December 31, 2015 to December 31 2017.

There are no changes to the terms and conditions of the existing license being requested; therefore, our office is processing this as a minor amendment. The NRC intends to issue the license after the required 30-day review period.

Sincerely,

A handwritten signature in red ink, appearing to read "Andrea R. Jones".

Andrea R. Jones, Chief  
Export Controls and Nonproliferation Branch  
Office of International Programs

Enclosure:  
Application Dated 11/25/2015  
XSNM3722/01 – The Netherlands  
Docket Number 11006019
