SUBJECT: NOTICE OF CONSIDERATION OF APPROVAL FOR THE INDIRECT TRANSFER OF CONTROL (CHANGE OF CONTROL) OF THE U.S NUCLEAR REGULATORY COMMISSION MATERIALS LICENSE NO. SUA-1580, CROWNPOINT URANIUM PROJECT, MCKINLEY COUNTY, NEW MEXICO, FROM HYDRO RESOURCES, INC., TO LARAMIDE RESOURCES LTD., OPPORTUNITY TO PROVIDE COMMENTS AND TO REQUEST A HEARING (TAC NO. L00799)

Dear President Begaye:

The U.S. Nuclear Regulatory Commission (NRC) received and is considering approval of an application for indirect transfer of control filed by Uranium Resources, Inc. (URI), on behalf of its wholly-owned subsidiary Hydro Resources, Inc. (HRI), to Laramide Resources Ltd. (Laramide), dated November 27, 2015. The application seeks NRC approval of the indirect transfer (change of control) of NRC Materials License SUA-1580 for the Crownpoint Uranium [*In Situ* Recovery (ISR)]¹ Project from HRI to Laramide. The NRC is notifying you of this action as you may have an interest due to the proximity of the project to Tribal lands.

HRI possess the Crownpoint Uranium Project uranium milling license SUA-1580. The Crownpoint Uranium Project is located in McKinley County, NM and contains four locations, Crownpoint, Unit 1, Churchrock Section 8, and Churchrock Section 17. The Crownpoint Uranium Project has not been constructed and has not operated.

On November 9, 2015, URI entered into a Letter of Intent with Laramide for the sale of NRC licensee HRI to Laramide (proposed transaction). The parties to the proposed transaction have requested that the NRC consent to the proposed indirect transfer of control as being in accordance with Section 184 of the Atomic Energy Act of 1954, as amended, and 10 CFR § 40.46. As a result of the proposed transaction, HRI has also requested an administrative amendment to the License to reflect HRI's new address: 62329 North Star Drive, Montrose, CO 81403.

The application may be found in the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS) at ML15334A483. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

¹ One of the two primary recovery methods that are currently used to extract uranium from ore bodies where they are normally found underground (in other words, *in situ*), without physical excavation. Also known as "solution mining" or *in situ* leaching.

R. Begaye

A notice of application for indirect transfer of license, opportunity to comment, request a hearing, and petition for leave to intervene was published on the NRC Web site on Friday, December 11, 2015, with a deadline of January 11, 2016, to provide comments or request a hearing. The notice can be found at <http://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing-license-applications.html>. Details on how to comment, request a hearing, and petition for leave to intervene is contained on the NRC Web site. Please forward this letter to other Tribal members or parties that may have an interest in this matter.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

The NRC is committed to engaging in a meaningful government-to-government interaction with Tribes and informing Native American communities of the nature of NRC's regulatory activities. Please contact Ron Linton of my staff if you have any questions. Mr. Linton can be reached at 301-415-7777 or via email Ron.Linton@nrc.gov.

Sincerely,

/RA/

Andrew Persinko, Acting Director
Division of Decommissioning, Uranium Recovery
and Waste Programs
Office of Nuclear Material Safety
and Safeguards

Docket No.: 040-08968
License No.: SUA-1580

cc: Kurt Vollbrecht, NMED
