**Subject:** (CAC MF5734/MF5735) Dresden Nuclear Power Station, Units 2 and 3 - Spent Fuel Pool Criticality Analysis LAR

Mr. Settles,

Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50.91(b)(4), "Notice for public comment; State consultation," states (in part) ...the Commission will make a good faith attempt to consult with the State before it issues a license amendment involving no significant hazards consideration.

The purpose of this message is to note that you (representing the State of Illinois, IEMA) were contacted by me today regarding Exelon's license amendment request (LAR) requesting NRC approval to modify the methodologies used in the Dresden Nuclear Power Station (DNPS), Units 2 and 3 spent fuel pool criticality safety analysis. We discussed that the NRC is close to finalizing the issuance of the amendment request, dated December 30, 2014, supplemented by letters dated May 8, 2015 and July 30, 2015, which are publically available in NRC ADAMS under Accession Nos. ML14364A100, ML15128A305, and ML15215A336, respectively. We discussed that information regarding this action was made publically available in the *Federal Register* published on November 5, 2015 (80 FR 68573).

As a result of our exchange, I understand that you are aware of the amendment request and at this time you have no questions or comments regarding this action.

If necessary, I can be contacted at 301.415.1129 to discuss further. Thank you for your time and attention today.
