---

Good morning Scott,

John-Chau forwarded your draft SGI Plan and asked that I review it and respond directly to you once I've completed my review. I've completed my review of your draft plan and have inserted both comments and recommended edits to the document. John-Chau recommended that I not respond in the form of Request for Additional Information (RAI).

Please take a look at the comments as well as the edits, then make the modifications to your plan that you believe are warranted. The attached document is password protected; I'll forward a second email that includes the password.

If you have any additional questions, please let both John-Chau and myself know,

Rob
