## **NRC Meeting Jan. 7 to Discuss Three Long-Term Lessons-Learned From Fukushima**

NRC staff will meet with the public and industry representatives Jan. 7 to discuss efforts to [resolve](#) three long-term issues raised by the Fukushima nuclear accident in 2011. The staff will discuss recommendations regarding enhanced reactor monitoring instrumentation, hardened vents for certain containment designs and hydrogen control.

The [meeting](#) will run from 1-4:30 p.m. on Jan. 7 in room O9B4 of the NRC's White Flint complex at 11555 Rockville Pike in Rockville, Md. NRC staff will describe the recommendations and the basis for resolving them. The public will have the opportunity to ask questions and provide comments regarding the staff's work.

The meeting will include a teleconference and webinar. For the call-in number, webinar details, or more information on the issues to be discussed, please contact the NRC's Joseph Sebrosky at 301-415-1132, or via e-mail at [joseph.sebrosky@nrc.gov](mailto:joseph.sebrosky@nrc.gov); or William Reckley at 301-415-7490, or via e-mail at [william.reckley@nrc.gov](mailto:william.reckley@nrc.gov).
