Reference: Letter, GO2-15-159, W.G. Hettel (Energy Northwest) to NRC,
"10 CFR 50.71 Maintenance of Records Licensing Basis
Document Update and Biennial Commitment Change Report"

Dear Sir or Madam:

In the referenced letter, Energy Northwest submitted updated Columbia Generating Station (Columbia) Licensing Basis Documents including a publicly available version of Columbia's Final Safety Analysis Report (FSAR).

This submittal provides a complete version of the Columbia FSAR in electronic format in Attachment 2. The files are in the Portable Document Format (PDF). Attachment 1 contains a listing of the individual document component filenames comprising Attachment 2. The files have been sized to meet file size limitations for electronic submittals. Additionally, the PDF files in Attachment 2 contain hyperlinks. These hyperlinks are not essential to the FSAR content and are disabled.

Consistent with Energy Northwest's past FSAR submittals, Energy Northwest requests that the files contained in Attachment 2 be withheld from public disclosure, in accordance with 10 CFR 2.390(d)(1). Energy Northwest recognizes that a draft Regulatory Issue Summary (RIS) has been issued addressing the public availability of FSAR information and is currently evaluating the impact to future FSAR biennial submittals.

There are no commitments being made to the NRC by this letter.

If you have any questions or desire additional information pertaining to this report, please contact Ms. L.L. Williams, Licensing Supervisor, at (509)377-8148.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on 12/17/15.

Respectfully,
