Docket No. 52-017
COL/DBE

DOMINION VIRGINIA POWER
NORTH ANNA UNIT 3 COMBINED LICENSE APPLICATION
SUBMISSION OF SEISMIC TECHNICAL REPORTS

In the North Anna Unit 3 (NA3) Seismic Closure Plan (SCP) (ML14297A199), Dominion committed to provide the NRC various technical reports on a defined schedule to support the NRC's review. This letter provides four reports associated with the SCP.

The report in Enclosure 1 is being submitted in place of the three Seismic Fragility Reports referenced on page 40 of the SCP. The report in Enclosure 2 provides supplemental information to the Containment Internal Structures Design Report listed on page 39 of the SCP. The two reports provided in Enclosures 3 and 4 are revised reports as a result of the NRC's audit from September 28, 2015 to October 2, 2015.

The following GEH reports are provided in the attached enclosures (the report numbers as listed in the Seismic Closure Plan are shown in parentheses):

- GEH report number 003N1084 (TBD) Revision 0, North Anna Unit 3 Site-Specific Seismic Margins Analysis Update
- GEH report number WG3-T11-DRD-S-0002 (Not listed in SCP) Revision 0, ESBWR Structural Design Report for Containment Liner Plate
- GEH report number WG3-U63-ERD-S-0001 (SER-DMN-004) Revision 2, Firewater Service Complex Seismic Analysis Report
- GEH report number WG3-U73-ERD-S-0001 (SER-DMN-0003) Revision 2, Control Building Seismic Analysis Report

The enclosures to this letter provide paper copies of the reports being sent to the Document Control Desk to be scanned and entered into ADAMS. A DVD containing electronic copies of the reports is being sent to the NRC project manager, with additional copies available upon request. None of the reports contain proprietary or security-related information.

By submitting this letter (along with Dominion Letter No. NA3-15-037 also submitted this month), Dominion has fulfilled its commitments as described in the SCP.
