Hello Mr. Stephen Burns:

I am writing to request that you do all you can to close the Pilgrim Nuclear Plant even sooner than the proposed 2019 scheduled date.

From now to that closing date, the plant will get 'patch up' repairs when more costly service is required.

Why lay out big funds when the plant will be closing?

Also, good plant employers will now seek other job options..why should they wait?

So, experienced personnel will gradually be depleted before the plant actually closes.

You are putting at risk my life & fellow Cape Cod residents by this 3+ year delay.

Please do all you can to close this plant in 2016!

Sincerely,
Maddy Judge
Osterville, MA
