5RC FORM 374 U.S. NUCLEA	PAGE <u>1</u> OF <u>5</u> PAGES Amendment No. 42							
MATERIALS LICENSE Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 37, 39, 40, 70 and 71, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.								
Licensee	In accordance with lett	ter dated						
1. DMS Health Technologies	October 14, 2015 3. License number 40- its entirety to read as fo	-32477-01 is amended in follows:						
2. 109 South Petro Avenue	4. Expiration date April 5. Docket No. 030-364	30, 2022						
Sioux Falls, South Dakota 57107	04							
 Byproduct, source, and/or special 7. Chemical and/or physical form 8. Maximum amount that licensee r possess at any one time under th license 								
A. Any byproduct material A. Any A. As needed permitted by 10 CFR 35.100								
B. Any byproduct material permitted by 10 CFR 35.200 B. Any B. As needed								
C. Any byproduct material C. Prepackaged kits C. 30 millicuries total permitted by 10 CFR 31.11								
	Sealed source (QSA Global, Inc., Model 77302)	D. 200 millicuries per source and 200 millicuries total						
9. Authorized use:	Allen 2							
A. Any uptake, dilution and excretion stu	dy permitted by 10 CFR 35.100.							
B. Any imaging and localization study permitted by 10 CFR 35.200.								
C. In <u>vitro</u> studies.								
D. For storage only.								
CONDITIONS								
10. A. Licensed material may be received, stored, and dispatched from the licensee's facilities located at:								
 (i) 109 South Petro Avenue, Sioux Falls, South Dakota (ii) 305 7th Avenue SE., Watertown, South Dakota

ł		Licensed material may be received by licensee perfacilities located at:	ersonnel only, used, and stored at the following fixed					
		(i) 109 South Petro Avenue, Sioux Falls, South Dakota						
(C. Licensed material (excluding Item 6.D.) may be received, stored and used at temporary job sites anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material, including areas of exclusive Federal jurisdiction within Agreement States.							
	If the jurisdiction status of a Federal facility within an Agreement State is unknown, the licensee should contact the federal agency controlling the job site in question to determine whether the proposed job site is an area of exclusive Federal jurisdiction. Authorization for use of radioactive materials at job sites in Agreement States not under exclusive Federal jurisdiction shall be obtained from the appropriate state regulatory agency.							
11.	The	Radiation Safety Officer for this license is Michel	le White.					
12.	Lice	ensed material is only authorized for use by, or un	der the supervision of:					
	A. Individuals permitted to work as an authorized user and/or authorized nuclear pharmacist in accordance with 10 CFR 35.13 and 35.14.							
	В.	The following individuals are authorized users for	the material and medical uses indicated:					
		Authorized Users Ma	iterial and Use					
		Christopher D. Fischer, M.D. 35.	100; 35.200; 31.11;

- 13. For sealed sources not associated with 10 CFR Part 35 use, the following conditions apply:
 - A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State.
 - B. Notwithstanding Paragraph A of this Condition, sealed sources designed to primarily emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed 3 months.
 - C. In the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State, prior to the transfer, a sealed source received from another person shall not be put into use until tested and the test results received.
 - D. Sealed sources need not be tested if they contain only hydrogen-3; or they contain only a radioactive gas; or the half-life of the isotope is 30 days or less; or they contain not more than 100 microcuries of beta- and/or gamma-emitting material or not more than 10 microcuries of alpha-emitting material.

NRC FORM 37	74A U.S. NUCLEAR REGULATORY COMMISSION	PAGE 4 of 5 PAGES				
		License Number 40-32477-01				
	MATERIALS LICENSE SUPPLEMENTARY SHEET	Docket or Reference Number 030-36404				
		Amendment No. 42				
E.	Sealed sources need not be tested if they are in s they are removed from storage for use or transfer within the required leak test interval, they shall be shall be stored for a period of more than 10 years contamination.	red to another person and have not been tested tested before use or transfer. No sealed source				
F.	F. The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations. The report shall be filed within 5 days of the date the leak test result is known with the U.S. Nuclear Regulatory Commission, Region IV, 1600 East Lamar Boulevard, Arlington, Texas 76011-4511, ATTN: Director, Division of Nuclear Materials Safety. The report shall specify the source involved, the test results, and corrective action taken.					
G.	Tests for leakage and/or contamination, including performed by the licensee or by other persons spectrum commission or an Agreement State to perform su	ecifically licensed by the U.S. Nuclear Regulatory				
Н.	Records of leak test results shall be kept in units of	of microcuries and shall be maintained for 3 years.				
	Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee.					
U.S. unde inve	The licensee shall conduct a physical inventory every 6 months, or at other intervals approved by the U.S. Nuclear Regulatory Commission, to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.					
mate	In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 10 CFR 30.35(d) for establishing financial assurance for decommissioning.					

17. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."

- 18. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. This license condition applies only to those procedures that are required to be submitted in accordance with the regulations. Additionally, this license condition does not limit the licensee's ability to make changes to the radiation protection program as provided for in 10 CFR 35.26. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
