Subject: Acceptance Review for Hope Creek Relief Requests GR-01, PR-01, PR-02, VR-01, and VR-02 (CAC Nos. MF7200, MF7204, MF7203, MF7202, and MF7201)

Importance: High

Dear Paul Duke:

By letter dated December 18, 2015, (Agencywide Documents Access and Management System (ADAMS) Accession No. ML15352A127), PSEG Nuclear LLC (PSEG) submitted relief requests GR-01, PR-01, PR-02, VR-01, and VR-02 for the Fourth Ten-Year Inservice Testing (IST) Interval for the Hope Creek Generating Station (HCGS). The purpose of this correspondence is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of these relief requests. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed relief requests in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. You will be advised of any further information needed to support the NRC staff's detailed technical review by separate correspondence.

If you have any questions, please contact me at (301) 415-1022 or via e-mail at Robert.Gladney@nrc.gov.

Regards,

Robert L. Gladney
