Dear Ms. Bladey:

The Monroe County Chamber of Commerce supports the Fermi 2 license renewal application.

Since its inception, Fermi has been an economic powerhouse in Monroe County. Since it was licensed in 1985, it has employed thousands of men and women and pumped hundreds of millions of dollars into a local economy. Even more importantly, the plant has helped provide a reliable supply of electricity to the residents and businesses of Monroe County and the rest of southeast Michigan.

Fermi 2 Power Plant has been one of our largest taxpayers and employers in Monroe County. They are a key philanthropic partner as well. This year marks nearly \$40,000 raised for the Monroe County Chamber's LEADERSHIP MONROE Program through the great efforts of the Fermi 2 Refueling Outage coupon book program. The proceeds from the fundraiser benefit scholarships and training for non-profits and groups wishing to participate in this fine leadership program. Many of the past alumni are employees and retirees of Fermi 2 and DTE Energy. The Company is also one of our longest standing sponsors of Chamber events that contribute to the quality of life in Monroe County.

Renewing the license of Fermi 2 is a cost-effective way to ensure that DTE Energy is able to continue providing reliable, affordable electricity to our region for decades to come.

Thank you for your consideration,

Michelle S. Dugan
Executive Director
