Subject: [External_Sender] Fermi 2 license renewal

2016 JAN -4 AM 9:18

Importance: High

RECEIVED

NRC:

I am against the license renewal of Fermi2 for various reasons which I will state here in compact form:

1. Fermi2 produces nuclear waste which there is no safe solution for.
2. Fermi2 will continue to be a public liability and threat to the health and well being of the community.
3. Fermi3 has and will continue to need expensive repairs to try to keep it operational.
4. By sinking money into keeping Fermi2 operating, it will pull resources from truly 'green' energy such as wind, water and solar power and instead invest it into dangerous, polluting nuclear energy.
5. Fermi2 releases routine radioactive emissions into the environment. Therefore, even if Fermi2 operates without a melt down, it is still contaminating the environment by operating.

For these reasons I request that you not re-license Fermi2. Groups like the Sierra Club and others have gone into details of flaws at the aging nuclear plant. I have not given those details, but a broad view which acknowledges the truth of the details mentioned by the Sierra Club, Beyond Nuclear, NEIS etc.

Sincerely,

*Kathryn Barnes
