4. Letter from Jerald G. Head, GEH, to USNRC, Subject: NRC Request for Additional Information Letter Number 2 Related to Chapters 1, 2, and 12 for GE-Hitachi Nuclear Energy Advanced Boiling Water Reactor Design Certification Rule Renewal Application – GEH Supplemental Response #2 to RAI 02-1, November 5, 2015

In regard to the Requests for Additional Information transmitted in your September 25, 2014 letter, Reference 1, GEH initially responded to RAI 02-1 in Reference 2. Following a public and private meeting held with the NRC on May 7th, GEH was requested to provide supplemental information to Reference 2. That supplemental information was provided in Reference 3.

In a public meeting held between the NRC and GEH on October 15th, 2015, Reference 3 was reviewed and GEH was requested to provide additional supplemental information for RAI 02-1 for the staff's review. This supplemental information was provided in Reference 3.

While reviewing the final files for ABWR DCD Revision 6 to be submitted to the NRC, GEH found duplicate information that should have been revised in our previous DCD markups on Hurricanes that the NRC requested GEH modify.

Please find attached supplemental DCD markup for response #3 to RAI 02-1. Enclosure 1 contains the corrected Design Control Document markups associated with DCD Section 3H to complete GEH's response to supplemental information request #2 to RAI 02-1 (Reference 4). No other changes to those responses or markups submitted previously are needed.

If you have any questions concerning this letter, please contact Hugh Upton at 408-314-8499.

I declare under penalty of perjury that the foregoing information is true and correct to the best of my knowledge, information, and belief.

Sincerely,

Jerald G. Head
Senior Vice President, Regulatory Affairs

Commitments: No additional commitments are made in this response.
