Attention: Mr. R. Reid, Chief
Operating Reactor Branch #4

Reference: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Sir:

My letter of May 5, 1978 reported the results of the initial cable penetration fire stop testing conducted on April 28, 1978 and stated that further testing would be conducted.

On May 10, 1978, a test was successfully conducted on a modified fire stop design. This design incorporates four inches of monokote, currently in use at Oconee and six inches of "Firewell," a fire resistant material manufactured by the Chemtrol Company. The test was conducted in accordance with the standard for Cable Penetration Fire Stop Qualification Test, IEEE P634/D4.

This modified design will be utilized at Oconee and it is expected that all affected fire stops will be modified to this design by December 31, 1978.

Very truly yours,

William O. Parker, Jr.
