Submittal Discussion

SUMMARY

On January 13, 2016, the Nuclear Regulatory Commission contacted Mr. William (Bill) Peterson regarding a hard copy submittal of a Safety Analysis Report, Environmental Report and other information associated with a license application for an away from reactor spent fuel storage facility at Pigeon Spur, Utah which was received by the Division of Spent Fuel Management in the Office of Nuclear Material Safety and Safeguards in late October, 2015. The October, 2015 submittal contained duplicate information of a license application submitted in 1998 for the Pigeon Spur site. The Nuclear Regulatory Commission contacted Mr. Peterson seeking direction because a letter requesting the NRC review the information had not been provided with the October, 2015 submittal. In the ensuing phone conversation, Mr. Peterson requested the Nuclear Regulatory Commission retain the information in the submittal, but stated no action need be taken at the present time because he was attempting to secure the financial backing for the design review, construction and operation of a spent fuel facility at the Pigeon Spur site.
