Office of Nuclear Material Safety and Safeguards  
Attn: GLTS  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555-0001

Dear USNRC Representative:

Subject: Listing of generally licensed device under GL-650307 in USNRC database

On 10/27/15, Hector Luis Rodriguez-Luccioni, Ph.D., USNRC-Office of Nuclear Material Safety and Safety Guards (phone: 301-415-6004), contacted Kent Theurer, Emergency Management Specialist, North Dakota Department of Agriculture, via email regarding the disposition of the following generally licensed device under GL-650307 in the USNRC database that was purchased or transferred sometime in 1997:

- Manufacturer: PerkinElmer Sciences
- Model: B1600ML
- Serial Number: 2060094
- Isotope: Ba-133

Based on PerkinElmer records, the following corrections need to be made to the USNRC Database:

- The Serial Number of this device is 415290. (The number "2060094" is a sales order number.)
- The device was distributed to the U.S. Department of Agriculture-Human Nutrition Research Center (HNRC), 2420 2<sup>nd</sup> Avenue North, Grand Forks, North Dakota, 58203.

I do not have an explanation of why this discrepancy exists between the USNRC's record and PerkinElmer's record. Please contact me if you have any questions, comments, or concerns about the information contained in this letter. My office telephone number is 774-278-2715 and my email address is [joseph.dippolito@perkinelmer.com](mailto:joseph.dippolito@perkinelmer.com).

Sincerely,

Joseph A. D'Ippolito  
EH&S Specialist/Radiation Safety Officer  
PerkinElmer Health Sciences  
Radioactive Materials License 56-0683
