The only permit I can find that was renewed recently was for the Harbor district permit for discharge canal work. That was like the end of January.

The date I show is 11/23/2013. The rev 1 submitted is complete with the exception for recent changes in wall design and some changes to schedule that will be updated in the next revision of the LTP once rev 1 is approved. We have no changes identified that will require prior NRC approval.

I also saw your note about permits. We seem to be continually renewing and requesting additional county permits as work progresses. It's getting more confusing now that we have CB&I doing permitting work for the site (mostly grading permits and temporary trailers) as well as PG&E engineering and PG&E Corporate. I'll see what I can find out and get back to you on permits.

I was home for the weekend and just got back in this morning – reason for not getting back to you sooner.

Good morning, Bill. When was the GTCC waste placed in the ISFSI? Thanks.

BTW, does the NRC have the latest (and complete) information on the LTP?
