---

Amy and Diana,

Mr. Erik Hein, the Executive Director at NCSHPO, has sent out an email this afternoon to all the SHPOs and Deputy SHPOs (DSHPOs) with a summary of the Section 106 consultation and the recommendation that NRC does not think the undertaking has the potential to effect historic properties.

If I hear anything from the SHPOs/DSHPOs, I will let you know.

Have a great weekend,

Sarah

Sarah,

Thank you very much.

Also, it was brought to my attention today that we inadvertently overlooked sending a consultation to the NC SHPO for Fort Bragg NC. I contacted Ms. Rene Gledhill-Earley, Environmental Review Coordinator at the North Carolina Natural and Cultural Resources and left a message. I will try to speak with her in person later today. Also, I plan to send a letter to her to provide the NRC SHPO with further information about this undertaking, inform them about our conclusions and determination, and ask that they provide their concurrence regarding the NRC's conclusion and determination specific to the site located at Fort Bragg NC. I plan to ask for 30 days to provide comments or concurrence. I will email after I make contact with her and also provide you the ML number of the letter once it is ready.

If you have any questions, please contact me.

Thanks

---

Amy and Diana,

I just talked to Mr. Erik Hein, the Executive Director at the NCSHPO, and he has not sent out any emails or communications, yet, concerning this project.

I resent an email message to him including Tennessee to the list of states and SHPOs to consult with concerning this undertaking.

I expect the NCSHPO to send this email out soon to all the concerned SHPOs. Mr. Erik Hein will cc me on the email that he sends out. I will keep you posted and let you know when it is sent out.

Thank you,  
Sarah

Hi Amy,

Thank you for letting me know. I did not realize that Fort Campbell is located in two states.

I will contact Mr. Erik Hein, Executive Director at NCSHPO, and let him know that the TN SHPO should be added to the list of SHPOs to contact for this project.

I will email you after I talk to the NCSHPO and provide a summary of my conversation with Mr. Erik Hein.

Thank you, again,

Sarah

Hi Sarah,

I wanted to bring to your attention that Fort Campbell has an KY address but the site that has Davy Crockett DU is located partly in KY and partly in TN.

We sent consultation letters to both the TN SHPO and the KY SHPO

The ADAMS references are ML15309A228, ML15309A223 (TN); and ML15309A249(KY).

We noticed that the ACHP did not include TN.

If you have any questions, please contact me.

Thank you

A

Amy and Diana,

The ACHP sent this email to Mr. Erik Hein, Executive Director of NCSHPO, this morning.

Please see forwarded email below.

Let me know if you have any questions or comments.

Thank you,

Sarah

**Subject:** NW/Army Installations in 15 States/NRC/License Amendment Application Depleted Uranium for Davy Crockett Weapons System

Dear Mr. Erik Hein,

The Advisory Council on Historic Preservation (ACHP) was contacted by the California Office of Historic Preservation (CA SHPO) concerning a specific U.S. Nuclear Regulatory Commission (NRC) Section 106 consultation and if the undertaking has the potential to effect historic properties. The undertaking involves the U.S. Army's request for amendment of materials license No. SUC-1593 to include additional sites that possess depleted uranium (DU) from the Davy Crockett Weapon System.

On October 23, 2013, the NRC issued Sources Materials License No. SUC-1593 to the Army for possession of DU from the Davy Crockett weapon system at two Army installations in Hawaii. Around the same time, the Army determined that the Davy Crockett System has been used at multiple Army installations (in 14 other states not including Hawaii) and that the amount of DU present at each of these other installations was of a sufficient amount that the Army would be required to request an amendment to the license that would add the Davy Crockett DU at the other sites to the license. The Army elected to address License Condition No. 12 using a programmatic approach with one license amendment application to cover all 17 sites that must be licensed, including the two in Hawaii. The license amendment would involve the following U.S. Army installations: Forts Benning and Gordon (Georgia); Fort Campbell (Kentucky); Fort Carson (Colorado); Fort Hood (Texas); Fort Knox (Kentucky); Joint Base Lewis-McChord and the Yakima Training Center (Washington); Fort Bragg (North Carolina); Fort Polk (Louisiana); Fort Sill (Oklahoma); Fort Jackson (South Carolina); Fort Hunter Liggett (California); Fort Greeley (Alaska); Fort Dix (New Jersey); and Fort Riley (Kansas). The Section 106 consultation with the Hawaii SHPO has been concluded.

Following the ACHP's review of the publicly available documents, and discussions with NRC, the ACHP agrees with NRC that this undertaking does not have the potential to effect historic properties, therefore, NRC may invoke 36 CFR 800.3(a)(1) of our regulations, "Protection of Historic Properties" (36 CFR Part 800). As drafted, the license amendment authorizes only the possession of

DU. Accordingly, any clean-up activities, decommissioning activities, or transportation of DU would be considered a separate action, requiring compliance with NEPA and NHPA. Before we submit our recommendations to the CA SHPO, we would like to provide other SHPOs with Army installations that have Davy Crockett weapons systems in their States to provide their opinions to the ACHP about the applicability of Section 800.3(a)(1) of our regulations.

The NRC has already sent Section 106 consultation letters to the concerned SHPOs initiating the Section 106 consultation. Due to the significant number of states involved in this undertaking, working with the National Conference State Historic Preservation Office (NCSHPO) appears to be an efficient way to approach this matter. SHPOs that have been contacted by NRC include Georgia, Kentucky, Colorado, Texas, Kentucky, Washington, North Carolina, Louisiana, Oklahoma, South Carolina, California, Alaska, New Jersey, and Kansas.

Should you or the SHPOs want detailed background information regarding the undertaking and the license amendment, you should visit the NRC site in this link <http://www.nrc.gov/reading-rm/doc-collections/fact-sheets/bg-license-app-du.html>. In addition, you can review the following documents which describe the undertaking and the environmental reviews conducted for them, to date.

Document	Accession Number
Army's License amendment application (6/1/2015)	ML15161A454
Environmental evaluation for license amendment (6/1/2015)	ML15160A509
Army's Source Materials License No. SUC-1593 (10/23/2013)	ML13259A062
Federal Register notice for the proposed licensing action	ML15210A249
Guidance for material license (NUREG-1556, Volume 7)	ML010370258
Environmental Review Guidance (NUREG-1748, Appendix B)	ML032450279

If you have any questions, please contact the ACHP NRC Liaison Sarah Stokely ([sstokely@achp.gov](mailto:sstokely@achp.gov); 202-517-0224).

Thank you,

Charlene Dwin Vaughn
